Contents

Volume 22

MODEL SYSTEMS

Representing and defining patterns by graphs: applications to sol-gel patterns and to cytoskeleton
W. Klonowski (Halifax, Canada) 1

Time delays in metabolic control systems
E. Mizraji, L. Acerenza and J. Hernández (Montevideo, Uruguay) 11

Interrelations between glycolysis and the hexose monophosphate shunt in erythrocytes as studied on the basis of a mathematical model
R. Schuster, H.-G. Holzhütter and G. Jacobasch (Berlin, G.D.R.) 19

Autopoiesis: the status of its system logic
G.R. Fleischaker (Boston, MA) 37

A model linking water and protein structures
J.G. Watterson (Clayton, Australia) 51

CELLS

Role of divalent metals in the activation and regulation of insulin receptor tyrosine kinase
P.P. Vicario, R. Saperstein and A. Bennun (Newark and Rahway, NJ) 55

ORGANISMS AND POPULATIONS

The ultrastructure and possible relationships of four obligate anaerobic chytridiomycete fungi from the rumen of sheep
A.E. Munn, C.G. Orpin and C.A. Greenwood (Cambridge, U.K. and Tromsø, Norway) 67

BOOK REVIEWS 83

MOLECULAR SYSTEMS

Supramolecular organization of tricarboxylic acid cycle enzymes
A.E. Lyubarev and B.I. Kurganov (Moscow, U.S.S.R.) 91

CELLS

Implications for evolution of nuclear structures of animals, plants, fungi and protoctists
L.F. Jiménez-García, J.M. Elizundia, B. López-Zamorano, A. Maciel, G. Zavala, O.M. Echeverría and G.H. Vázquez-Nin (Mexico City, Mexico) 103

MODEL SYSTEMS

Cell motility: an interplay between local and non-local measurement
K. Matsuno (Nagaoka, Japan) 117

Kinetics of actin-myosin binding. ATP-ase activity and sol-gel dissipative structures
W. Klonowski (Halifax, Canada) 127
Quantum molecular computer model of the neuron and a pathway to the union of the sciences
E.A. Liberman, S.V. Minina and N.E. Shklovsky-Kordi (Moscow, U.S.S.R.) 135
Biochemical switching device: How to turn on (off) the switch
M. Okamoto, T. Sakai and K. Hayashi (Fukuoka, Japan) 155
Population processing - a powerful class of parallel algorithms
W. Banzhaf (Stuttgart, F.R.G.) 163

ANNOUNCEMENT 173
CORRIGENDUM 175

GENETIC CODE
The code within the codons
F.J.R. Taylor and D. Coates (Vancouver, Canada and Oxford, U.K.) 177
On the information content of the genetic code
T. Alvager, G. Graham, R. Hilleke, D. Hutchison and J. Westgard (Terre Haute, IN) 189

BIOLOGICAL INFORMATION PROCESSING
The brain-machine disanalogy
M. Conrad (Detroit, MI) 197
Phase conjugation model for information transfer in the nervous system
Y. Kosugi and T. Honma (Yokohama, Japan) 215
Biological information processing: the use of information for the support of function
R.R. Kampfner (Dearborn, MI) 223

OTHER MODEL SYTEMS
Circuit analysis of the oscillatory state in glycolysis
A. Boiteux and H.-G. Busse (Dortmund and Kiel, F.R.G.) 231
Kinetic implications of structural modification in protein turnover
P. Hilditch, H. Thomas and K. Lucas (Dyfed, U.K.) 241
A mathematical model for the computation of the oxygen dissociation curve in human blood
M. Sharan, M.P. Singh and A. Aminataei (New Delhi, India) 249

MODEL SYSTEMS
Dynamic pattern processing with adaptive excitable media
Ch. Zülicke, W. Ebeling and L. Schimansky-Geier (Berlin, F.R.G.) 261
The effect of the yield expression on the existence of oscillatory behavior in a three-variable model of a continuous fermentation system subject to product inhibition
Y. Lenbury and M. Punpocha (Bangkok, Thailand) 273
Diffusion-driven period-doubling bifurcations
M. Kot (Knoxville, TN) 279
The qualitative approach in investigating the role of species interactions on stability of natural communities
A. Bodini and G. Giavelli (Parma, Italy) 289

INFORMATION PROCESSING
A word of a natural language has 2.718 different meanings or slightly more
K. Matsuno and J. Lu (Nagaoka, Japan) 301

MOLECULAR SYSTEMS
Porphyrin-proteinoid complexes as models of prebiotic photosensitizers
Z. Masinovský, G.I. Lozovaya, A.A. Sivash and M. Drašner (Prague, Czechoslovakia and Kiev, USSR) 305

TRANSLATIONAL CONTROL
The phosphorylation of eukaryotic initiation factor 2:
A principle of translational control in mammalian cells
T.F. Sarre (Freiburg, F.R.G.) 311

COMMUNITIES AND ECOSYSTEMS
Gingkos and multituberculates: evolutionary interactions in the Tertiary
P. Del Tredici (Jamaica Plain, MA) 327

BOOK REVIEW 341
